

These Conduits are made of flame-retardant Polyamide 6. They are flexible, halogen-free and have a small bending radius. They offer good impact resistance and are suitable for various applications such as ship and train building, machine building, tramway, movable machine parts, etc. These Conduits offer IP 67 protection in combination with Conduit Glands. UV resistant Conduits are also available on request. These Conduits are available in grey and black colours and comply with EN 60529 and IEC 61386 standards.
